

NOAA Veterans Conservation Corps Fisheries Internship Program with Puget Sound Restoration Fund

Marine Science Internship

This internship will offer participation in PSRF's programs at the Chew Center for Shellfish Research and Restoration at the Northwest Fisheries Science Center's Manchester Research Station, including hatchery production of restoration-grade pinto abalone, Olympia oysters, and possibly kelp, microalgae culture, animal husbandry, data collection and management, and facilities maintenance.

- Full-time internship: Approx. 40 hours/week, four to five days each week, and can expect occasional weekend and nighttime field work activities
- Includes an \$1800 monthly stipend from VCC and a \$500 monthly supplemental stipend from PSRF, to assist with living expenses
- 6 month term beginning February 2022. Position open until filled.

Requirements:

- Must be a United States military veteran to be eligible for this position
- Ability to work outdoors in all weather conditions
- Ability to work independently and as a member of a team
- Strong self-initiative, and good attention to detail
- Follows appropriate safety practices in the lab and the field
- Preferred: Experience with marine or aquatic organism care or culture, microscopy, general laboratory equipment and procedures

Questions and to Apply:

E-mail a resume, a copy of your DD214, a copy of your current driver's license, and a cover letter explaining your interest in this internship to:

Kim Pham
